

Unipi Axon S215

PRODUCT DESCRIPTION

Unipi Axon S215 is a programmable logic controller (PLC) and gateway designed for automation, control, regulation and monitoring. The S215 features a combination of digital inputs and relay outputs while retaining its compact size. The controller is thus suitable for a wide range of applications in smaller installations that include monitoring, reading data from binary sensors and switching of external devices via relay outputs. The S215 also features a pair of serial interfaces (RS485 + RS232) for connection of extension modules or gateways.
